

# Ezzy Legacy Series

The Ezzy Legacy continues to evolve. For 2016, David gives the new Legacy a more controllable feel across a wider wind spectrum. The new Legacy is also stronger. High density Spectra X Film is now used on the tack panel as well as the use of a combination of RBS epoxy battens and traditional battens.

The mantra of the Legacy is the same. The Legacy Series is designed to offer a more economically priced option for sailors that demand the reputable Ezzy quality. The Legacy Sails deliver sublime performance and durability but we trim the costs by eliminating some of the extra bells and whistles.

The smaller Legacy's are designed for wave and bump&jump. The larger sizes are built for freeride blasting.

At the heart of it, the Legacy is ready to go to battle for anyone...from the PWA circuit (Graham's sail of choice for light wind competition) to recreational enthusiasts.

Size (sq.m.)	Luff		Boom		No. of Battens	Suggested Mast	Suggested Use
	min	max	min	max			
4.2	378	380	149	157	5	370/27/17	wave
4.7	402	404	157	165	5	400/25/19	wave
5.2	421	423	165	173	5	400/25/19	wave
5.5	435	437	172	180	5	430/25/21	freeride/wave
5.8	441	443	171	178	5	430/25/21	freeride/wave
6.5	452	455	189	198	6	430/25/21	freeride
7.5	475	478	202	212	6	460/25/25	freeride
