WAVE PANTHER III

Size	Luff min-max	Boom min-max	Ezzy Mast base/top
2.9	318 - 319	127 - 131	340 / 340
3.3	339 - 340	136 - 141	340 / 340
3.5	353 - 354	142 - 146	340 / 340
3.7	361 - 362	147 - 151	340 / 370
4.0	373 - 374	150 - 155	370 / 370
4.2	382 - 383	154 - 158	370 / 370
4.5	394 - 395	156 - 161	370 / 400
4.7	405 - 406	161 - 166	400 / 400
5.0	418 - 419	166 - 171	400 / 400
5.2	427 - 428	169 - 174	400 / 430
5.5	436 - 437	171 - 177	430 / 430
5.8	444 - 446	175 - 181	430 / 430
6.0	452 - 454	179 - 185	430 / 430
6.3	455 - 457	185 - 190	430 / 430
6.9	485 - 487	186 - 193	460 / 460

Jump on the Panther 3 and notice how easily it sails: no yank forward, no back-hand pressure, just a velvety smooth ride. Its low weight makes the Panther extra easy to toss around.

But despite its lightness, the Panther is strong. Each region of the sail consists of a unique material designed to address the loads specific to that part of the sail.

And even though the Panther 3 is the most tunable wave sail on the water, it is

also easy to rig thanks to the color coded downhaul marks and the color coded outhaul cords, making the sail's massive wind range easy to navigate.

And of course, quality is guaranteed because we rig every sail in our factory before it's shipped.
