

CHEETAH

photo: Maui Nerd Productions - rider: Kevin Pritchard

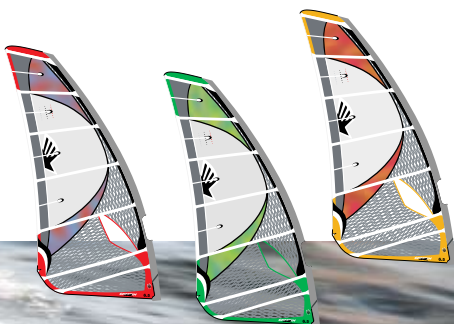

Chee-tah /'CHē-tə/ [noun]: the fastest no-cam sail on the water.

Size	Luff min-max	Boom min-max	Mast
5.5	437 - 439	175 - 183	430
6.0	446 - 448	183 - 190	430
6.5	456 - 458	191 - 198	430
7.0	467 - 470	197 - 205	460
7.5	479 - 482	206 - 214	460
8.5	504 - 507	221 - 229	490
9.5	517 - 520	239 - 247	490

Speed is the Ezzy Cheetah. With a strong, locked-in profile supported by seven horizontal shaping seams, the Cheetah is stable and balanced, allowing you to focus on going fast, even at the highest of speeds.

The materials used in making the Cheetah's body read as a list of ultra-high tech sail cloth materials: Technora on the leech resists stretch, white and color fusion Tri-Lite reduce weight, Spectra X ply give the Cheetah lasting durability, and the cnc'd stainless steel tack pulley makes down hauling a breeze.

And, as with every Ezzy, the Cheetah is rigged and tuned in our factory before being shipped out to your local shop.
