

Way back in 1999, we were the first sail company to develop and sell RDM masts. Twenty years later, the Ezzy mast has become the industry standard for performance and durability.

We developed the “mix and match” system that allows you to combine different length tops and bottoms. This means fewer masts in your quiver and better performance. Every one of our tops and bottoms is interchangeable with each other and backwards compatible with every year mast we have ever made.

Our masts bend in a standard constant curve,

which fits every Ezzy sail as well as sails from most other brands.

We have two mast lines: 1) the Hookipa at 91% carbon that is all about top performance and 2) the more economic Legacy XT at 60% carbon. Both masts have the same bend curve and are interchangeable with each other, so you can combine a Legacy top with a Hookipa bottom, or vice versa.

Over the years, windsurfers have learned to trust the Ezzy mast for both its strength and its performance. That’s why our masts are found at the most demanding beaches all around the world.

Length (CM)	Stiffness		Bend Curve			Hookipa (91%)	Legacy XT (60%)
	MCS	IMCS	Constant Curve	1/4%	3/4%	Weight	Weight
315*	30	14	yes	62%	77%	1.38 Kg**	1.48 Kg***
340	28	15	yes	62%	77%	1.46 Kg	1.60 Kg
370	27	17	yes	62%	77%	1.60 Kg	1.76 Kg
400	25	19	yes	62%	77%	1.71 Kg	1.91 Kg
430	25	22	yes	62%	77%	1.98 Kg	2.12 Kg
460	25	25	yes	62%	77%	2.23 Kg	2.43 Kg
490	26	30	yes	62%	77%	2.32 Kg	-
