

CHEETAH

F R E E R I D E

For nearly a decade, the Cheetah has set the industry standard for no-cam freeride sails—the perfect combination of stability, speed, and ease of use. The 2020 Cheetah progresses forward as the most advanced freeride sail we have ever built.

The new Cheetah features a substantial 1/2 pound (230 gram) weight reduction in each size. The new sail springs to life in your hands with an enhanced high-end range, snappier sail rotation, and higher top speed.

The Cheetah is one of our best-selling sails because of the wide wind range and uniquely stable design. David Ezzy's philosophy of incremental improvements year after year means that this new Cheetah will feel familiar and compatible with your quiver, while boosting performance.

The Cheetah features our endo-batten profile system that locks the shape into the panels, making the Cheetah very stable and intuitive to sail. The calibrated downhaul system insures an accurate and precise downhaul setting every time you rig.

As with all Ezzy Sails, quality and durability are baked into the design, ensuring that you will log many years of reliable sailing on your Cheetah. Every sail is rigged in our factory by our experienced craftsmen who scrutinize every millimeter from headcap to pulley. While rigged, the battens are tuned to be ready right out of the bag for your first session.

We obsess over our quality, so you can enjoy the Cheetah today and for many years to come.

Size	Luff		Boom		Suggested Mast	No. of Battens	Weight Kg
	Min	Max	Min	Max			
5.5	434	437	171	179	430/25/21	6	3.64
6.0	440	443	179	187	430/25/21	6	3.91
6.5	453	456	187	195	430/25/21	6	4.05
7.0	464	467	194	203	460/25/25	6	4.24
7.5	475	478	201	210	460/25/25	7	4.62
8.0	483	486	210	219	460/25/25	7	4.84
8.5	500	503	216	225	490/26/29	7	5.05
9.5	511	514	235	245	490/26/29	7	5.38
