

# LION

## TWO CAM FREERIDE

### Who is the Lion for?

Expert and advanced sailors who enjoy drag racing their friends, or just want to have fun cruising.

### What makes the Lion special?

The Lion blends power with control. The narrow mast sleeve makes water starting and uphauling easy. It can be run as a two cam, single cam, or no-cam sail.

### What's new about this Lion?

- 1) Faster
- 2) More stable
- 3) Lighter

### What else?

Less shape below the boom reduces profile drag making the Lion more “slippery” through the air.

A deeper profile above the boom gives earlier planing and stability.

New scrim reinforcements reduce weight by not absorbing water.

### Why buy a Lion?

The Lion is built with lightweight and strong scrim, Dyneema, and Technora sailcloth.

Our calibrated downhaul system shows you exactly where to set your downhaul.

The Lion comes with extra cams to fit any mast.

The Lion has a removable tack pulley that can be swapped out with a D-ring to use with a Duotone ratchet extension.

We pre-rig the Lion, tune the battens, and scrutinize our work, so the Lion is ready to go right out of the bag.

### Is the Lion the right sail for you?

If you value high performance freeriding above all else, you will love the Lion.

Size m <sup>2</sup>	Boom		Luff		No. of Battens	No. of Cams	Suggested Mast	Weight (Kg)
	Min	Max	Min	Max				
6.0	184	190	445	448	6	2	430/25/21	4.03
6.5	191	198	455	458	6	2	430/25/21	4.23
7.0	197	205	466	469	6	2	460/25/25	4.36
7.5	206	213	477	480	7	2	460/25/25	4.83
8.0	214	222	485	488	7	2	460/25/25	5.02
8.5	222	230	500	503	7	2	490/26/29	5.16
9.5	231	239	513	516	7	2	490/26/29	5.50
