

EZZY TAKA

Depowers Fast Off the Top

Hard-core wave sailors love the Taka's 3/4 batten above the boom. It lets the sail go neutral instantly, giving you smooth control when you're carving down the line or hitting the lip.

Light-Wind Wave Performance

Rig a smaller size and fill it up — you'll have just enough power to catch the wave, but with the handling and freedom of a smaller sail. The Taka comes alive in light-wind, real-world wave conditions.

Easy Loops, Soft Landings

The 3/4 batten's on-off luffing lets the Taka rotate effortlessly through forwards and backloops. It feels light in the air and forgiving on the landing. The trade-off? That quick depower keeps jumps a little lower than on the Ezzy Wave or Zorro.

Factory-Tuned Perfection

Every Taka is rigged and tuned in our factory before it leaves the floor. We check the shape, battens, and rigging gauges so that when you unroll it, it rigs perfectly — right out of the bag and every time after.

Is the Taka for You?

If you're after a light-wind wave sail that depowers instantly and feels loose and alive on the wave, the Taka is your sail. Radical maneuverability, total control — that's what it's made for.

RIGGING SPECIFICATIONS: 2026 Taka

SIZE	LUFF		BOOM		EZZY MAST		Weight
	Min	Max	Min	Max	Bottom/Top	Battens	
3.8	367	371	133	143	340 / 370	4	2.55
