

INFINITY 2010

More Power. The legendary Infinity has more horsepower per square meter than any sail in it's class.

Light and balanced. The deep, forward draft profile of the Infinity doesn't load your back arm when powered, giving the Infinity a very balanced feel on the water.

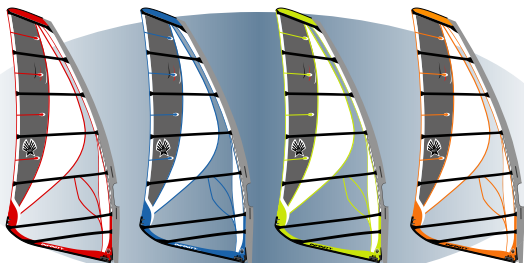

No Monofilm. The Infinity utilizes the world's most advanced materials. Light weight Technora® along the leech reduces stretch and improves performance. Spectra® X-film in the luff and window panels provides extra tear strength. The *new* TriLite scrim used in the center panels is super lightweight and very strong.

Easy to water-start and uphaul. The Infinity's narrow sleeve doesn't fill up with water.

Cams fit any mast. The Infinity cam system fits any RDM or SDM mast made within the past 15 years.

You're not the first to rig it. We already have. Every Infinity is rigged in our factory. We do a thorough check of our work plus tension the battens.

Unmatched customer service. We take our customers as seriously as we do our sails. Email us (info@ezzy.com) and you will get a personal response within 12 hours.

Size	Luff	Boom	Mast	Battens	Cams
6.0	455 - 457	187 - 193	430/25/21	6	2
6.5	468 - 470	196 - 202	460/25/25	6	2
7.0	478 - 481	204 - 211	460/25/25	7	2
7.5	488 - 492	212 - 219	460/25/25	7	2
8.5	507 - 509	227 - 234	490/26/29	7	2
9.5	514 - 517	244 - 251	490/26/29	7	2
